安徽南方化工泵业有限公司

ANHUI SOUTH CHEMICAL PUMP CO. LTD.

ENTERPRISE INTRODUCTION

企业简介

安徽南方化工泵业有限公司(原泾县南方耐腐蚀泵阀厂)创建于1999年，是一家专业生产陶瓷渣浆泵，耐腐蚀化工泵，不锈钢磁力泵，氟塑料磁力泵，氟塑料离心泵，衬氟泵的研发、生产、销售、服务于一体的高新技术企业。公司现有员工120余人，其中高级技术人才8人，中级技术人才16人。公司总部坐落在驰名中外的宣纸之乡、皖南事变发生地—泾县。

公司拥有技术研发大楼、现代化工业厂房、B级精度水泵测试中心、大功率金属磁力泵大功率衬氟磁力泵中试车间、拥有先进的磁路加工中心、高级人才公寓等设施。公司设有国内市场部、国际贸易部，并在国外设立办事机构，拥有自营进出口权，产品远销意大利、美国、俄罗斯、韩国、印度、新加坡等国家。

公司主要生产复合陶瓷渣浆泵、金属磁力泵、衬氟磁力泵、耐腐蚀化工离心泵、耐腐耐磨料浆泵等产品，其中金属磁力泵、衬氟磁力泵及衬氟化工离心泵技术达到了行业先进水平。公司NMQ系列金属磁力泵功率可达315kW，流量可达 $1000\text{m}^3/\text{h}$ ，单级扬程可达250m；IHF、IMD系列氟塑料离心泵、氟塑料磁力泵制造能力达200kW，NFS衬氟双吸泵流量可达 $5000\text{ m}^3/\text{h}$ 。是目前为数不多能够掌握该技术的企业之一。

公司先后荣获国家高新技术企业、安徽省名牌产品、安徽省著名商标、首届宣城市政府质量奖、安全环保无泄漏磁力泵数字化车间、宣城市工业互联网示范企业20强、2022年度皖美品牌示范企业、安徽省绿色工厂、安徽省省级工业设计中心、安徽省科技民营企业等称号。其中新型高效节能化工流程磁力泵被安徽省科技厅认定为“高新技术产品”。公司拥有18项磁力泵、衬氟泵领域关键技术专利。产品服务于石油化工、生物制药制酸、新能源、新材料、电力、冶金等领域的关键工艺上，解决了腐蚀与泄漏的难题，南方化工泵业坚持以“专注于腐蚀与贵重流体的安全输送”为理念，以“节能、环保、安全”为宗旨，以振兴民族工业为己任，努力打造性能可靠、客户满意的泵阀精品，服务于国内外用户。

全国30个直销办事处、10家授权服务商能在短时间解决用户购买与服务的需求，富有远见与创新的南方泵业人将不断开发无泄漏、节能环保新产品，为用户打造现代化清洁工厂、低污染工厂而努力追求，为人类的环境保护而努力奋斗。

Anhui Southern Chemical Pump Industry Co., Ltd. (formerly known as Jing County Southern Corrosion resistant Pump and Valve Factory) was founded in 1999. It is a high-tech enterprise specializing in the research and development, production, sales, and service of ceramic slurry pumps, corrosion resistant chemical pumps, stainless steel magnetic pumps, fluoroplastic magnetic pumps, fluoroplastic centrifugal pumps, and fluorine lined pumps. The company currently has more than 120 employees, including 8 senior technical talents and 16 intermediate technical talents. The company's headquarters is located in the famous hometown of rice paper and the location of the Anhui Southern Incident – Jing County.

The company has facilities such as a technology research and development building, a modern industrial factory, a B-level precision water pump testing center, a high-power metal magnetic pump, a high-power fluorine lined magnetic pump pilot plant, an advanced magnetic circuit processing center, and a senior talent apartment. The company has a domestic marketing department and an international trade department, and has established offices abroad. It has the right to self operate import and export, and its products are exported to countries such as Italy, the United States, Russia, South Korea, India, and Singapore.

The company mainly produces Composite Ceramic Slurry Pump, metal magnetic pumps, fluorine lined magnetic pumps, corrosion resistant chemical centrifugal pumps, corrosion-resistant and wear-resistant slurry pumps, and other products. Among them, the technology of metal magnetic pumps, fluorine lined magnetic pumps, and fluorine lined chemical centrifugal pumps has reached the advanced level in the industry. The company's NMQ series metal magnetic pump has a power of up to 315kW, a flow rate of up to $1000\text{m}^3/\text{h}$, and a single stage head of up to 250m; The manufacturing capacity of IHF and IMD series fluoroplastic centrifugal pumps and fluoroplastic magnetic pumps reaches 200kW, and the flow rate of NFS lined fluoroplastic double suction pumps can reach $5000\text{ m}^3/\text{h}$. It is currently one of the few enterprises that can master this technology.

The company has successively won the titles of National High tech Enterprise, Anhui Famous Brand Product, Anhui Famous Trademark, the First Xuancheng Municipal Government Quality Award, Safety, Environmental Protection and Leak free Magnetic Pump Digital Workshop, Xuancheng Top 20 Industrial Internet Demonstration Enterprises, Anhui American Brand Demonstration Enterprise in 2022, Anhui Green Factory, Anhui Provincial Industrial Design Center, Anhui Provincial Science and Technology Private Enterprise, etc. The new high-efficiency and energy-saving chemical process magnetic pump has been recognized as a "high-tech product" by the Anhui Provincial Department of Science and Technology. The company has 18 key technology patents in the field of magnetic pumps and fluorine lined pumps. Our products serve key processes in the fields of petrochemicals, biopharmaceutical acid production, new energy, new materials, electricity, metallurgy, etc., solving the problems of corrosion and leakage. Southern Chemical Pump Industry adheres to the concept of "focusing on the safe transportation of corrosion and precious fluids", with the aim of "energy conservation, environmental protection, and safety", and the responsibility of revitalizing national industry. We strive to create high-quality pump valves with reliable performance and customer satisfaction, serving domestic and foreign users.

30 direct sales offices and 10 authorized service providers across the country are able to meet the purchasing and service needs of users in a short period of time. The visionary and innovative Southern Pump Industry personnel will continuously develop leak free, energy-saving and environmentally friendly new products, striving to create modern clean and low pollution factories for users, and striving for environmental protection for humanity.

南方工业

NFZTC SERIES COMPOSITE CERAMIC SLURRY PUMP

NFZTC型复合陶瓷渣浆泵

MODEL SIGNIFICANCE OF YSZTC SERIES

COMPOSITE CERAMIC SLURRY PUMP

YSZTC系列复合陶瓷渣浆泵型号意义

NFZTC系列复合陶瓷渣浆泵可适用于矿山、电力、冶金、煤炭、建材等行业输送含有固体颗粒的磨蚀性或腐蚀性浆体，其允许输送的固液混合物的最大浆体重量浓度；灰（渣）浆和煤浆为45%，矿浆和重介为60%，NFZTC系列复合陶瓷渣浆泵根据用户需要可以串联运行。该系列渣浆泵已通过部级新产品鉴定和省级节能认证，结论认定：泵的各项性能指标居国内领先水平，大部分泵的效率指标达国际先进水平。

NFZTC series composite ceramic slurry pump can be used to transport abrasive or corrosive slurry containing solid particles in mining, electric power, metallurgy, coal, building materials and other industries. The maximum slurry weight concentration of solid-liquid mixture allowed to be transported is 45% for ash (slag)slurry and coal slurry, and 60% for mineral slurry and heavy medium. NFZTC series composite ceramic slurry pump can be operated in series according to the needs of users. This series of slurry pumps have passed the ministerial new product appraisal and provincial energy-saving certification. The conclusion is that the performance indexes of the pumps are at the leading level in China, and the efficiency indexes of most pumps reach the international advanced level.

结构型式与特点：

结构型式：按结构分为单壳泵和双壳泵两类。其中单壳泵包括NFDTC、NFDGTC等形式；双壳泵包括NFZTC等形式。按出口直径分为600mm、400mm、350mm、250mm、200mm、150mm、100mm、80mm、65mm、50mm、40mm、25mm等多种规格。

Structural type and characteristics:

Structure type: according to the structure, it is divided into single shell pump and double shell pump. The single shell pump includes NFDTC, NFDGTC and other forms; Double shell pump includes NFZTC and other forms. According to the outlet diameter, it is divided into 600mm, 400mm, 350mm, 250mm, 200mm, 150mm, 100mm, 80mm, 65mm, 50mm, 40mm, 25mm and other specifications.

结构特点

泵头结构：泵体视需要采用双层泵壳和单层泵壳。

双壳泵外壳结构为垂直中开式，出水口位置可按45°间隔，旋转8个不同安装使用。

托架结构：水平中开式。

悬架式。

轴封型式：副叶轮动力密封+填料密封。

填料密封。

机械密封。

Structural features:

Pump head structure: The pump body uses double layer pump body or single layer pump body according to needs.

The structure of the double-layer pump body is vertically opened, and the outlet position can be separated by 45 degrees, rotating 8 different directions.

Bracket structure: Horizontal opening

Suspension

Shaft seal form: Auxiliary impeller power seal + Packing seal

Packing seal

Mechanical seal

300 NFZTC - 60 (58) S, R

S材料烧结碳化硅，R材料柔性碳化硅

S material sintered silicon carbide, R material flexible silicon carbide

叶轮切割后的实际直径 (cm)

Actual diameter of impeller after cutting (cm)

叶轮直径 (cm) Impeller diameter (cm)

叶轮叶片数 (A为5枚; B为4枚; C为3枚; D为2枚)

Number of impeller blades (5 for a; 4 for B; 3 for C; 2 for D);

NFZTC为渣浆泵(NFZTCL为立式泵;NFZTCD为单壳泵;

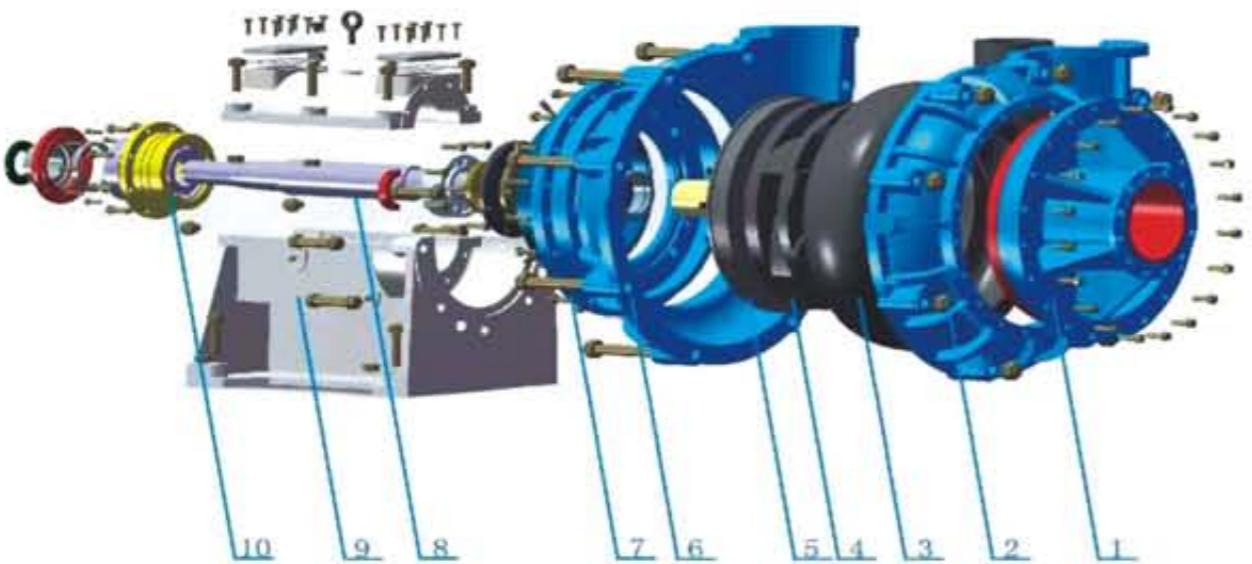

NFZTC is a slurry pump (NFZTCL is a vertical pump;

NFZTCD is a single shell pump;

泵出口直径 (mm) Pump outlet diameter

注：表中效率为采用填料轴封之值

Note: The efficiency refers to the value when packing shaft seal is used.

说明: 1.除150NFZTCL-A35 n=590r/min为皮带传动外, 其余均为直联传动;

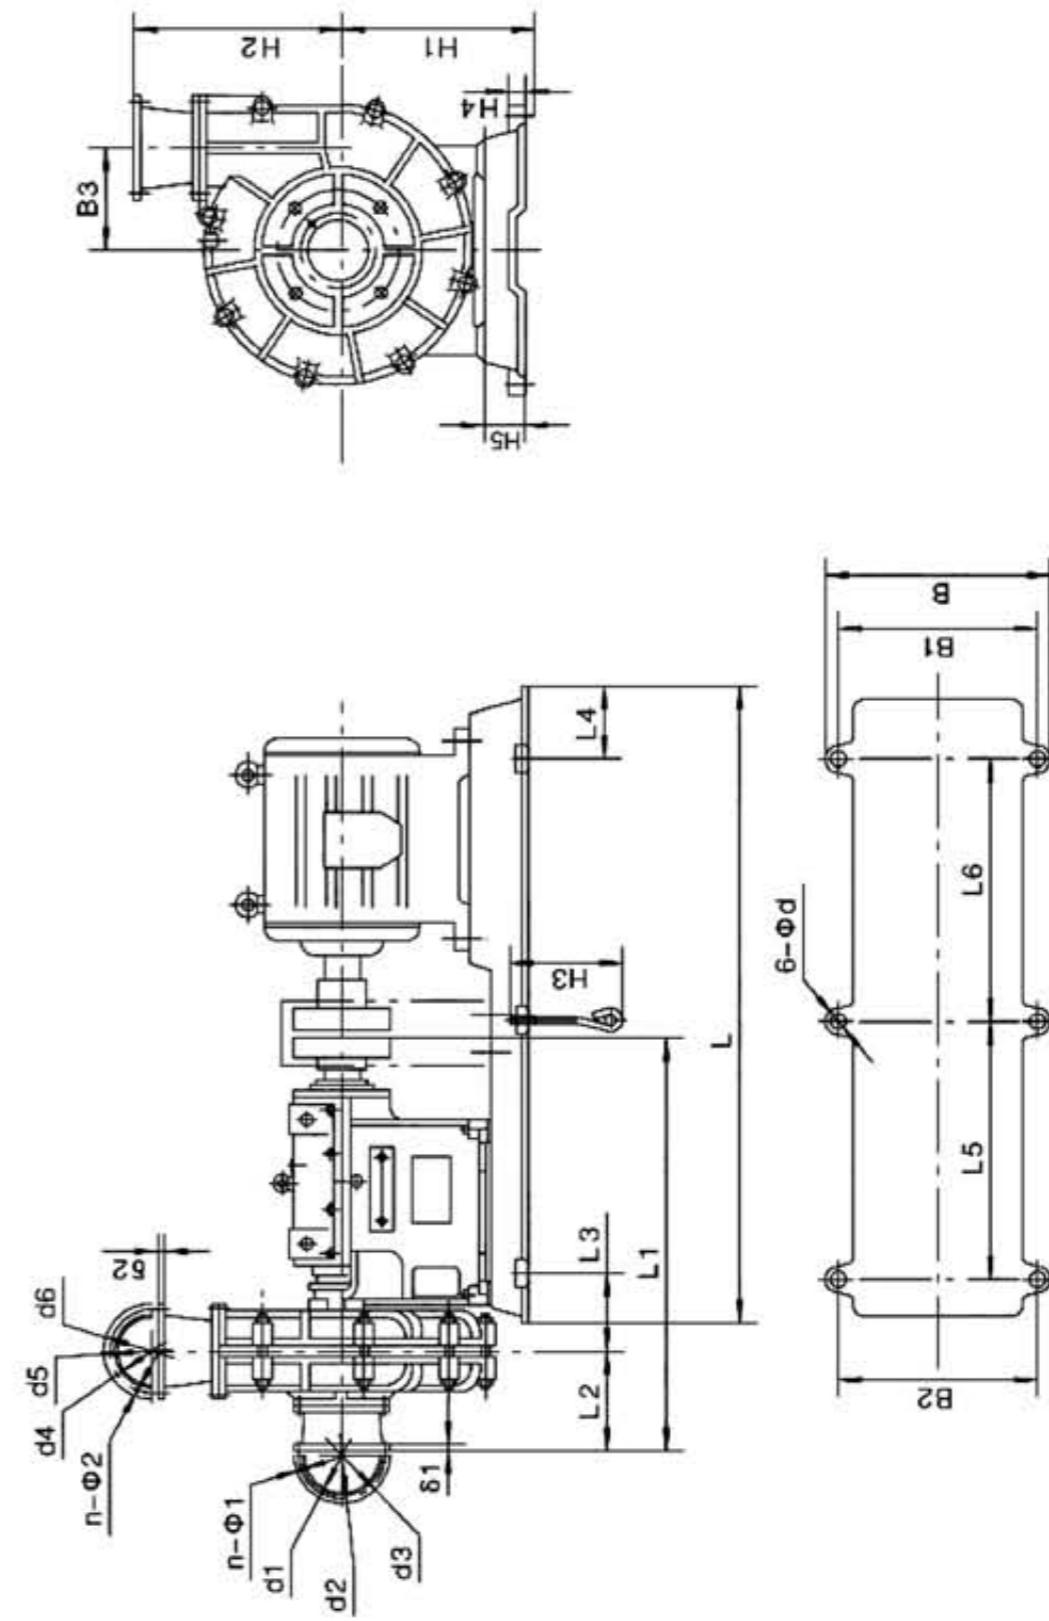

2.V1、B3、B5为电机的安装结构形式。

Note: 1.150NFZTCL-A35 (n=590r/min) is beltdriven while the others are alldirectly-coupled.

2.V1,B3,B5 are mounting patterns of motors.

NFZTC-B SERIES SLURRY PUMP

NFZTC-B系列渣浆泵

为了满足电力、冶金、煤炭等行业发展需要，针对除灰除渣及渣浆输送工况的特点，在几十年渣浆泵设计制造经验基础上，广泛吸取国内外先进技术和研究成果，我厂开发了我国最新一代大流量、高扬程、可多级串连的NFZTC-B系列渣浆泵。该系列产品的主要技术特点如下：

- 采用现代CAD设计方法，水利性能优良，效率高和磨损率低；流量宽畅，抗堵塞性能好，汽蚀性能优越；
- 采用副叶轮加填料组合式密封或机械密封，确保渣浆无泄漏；
- 可靠性设计，保证了整机平均无故障工作时间大幅度提高；
- 采用稀油润滑公制轴承，合理设置润滑与冷却系统，保证轴承在低温下状态下运行；
- 过流部件采用特殊材质，耐磨耐腐蚀性能好；
- 经特殊处理，用于海水除灰及海水和盐雾电化学腐蚀工况；
- 在允许的压力范围内可以多级串连使用，其允许最大工作压力为3.6MPa。

该系列渣浆泵产品具有结构合理、效率高、运行可靠和维修方便等优点，广泛适用于电力、冶金、矿山、煤炭、建材、化工等工业部门输送磨蚀性或腐蚀性渣浆，特点是电厂灰渣。

In order to meet the development needs of industries such as electricity, metallurgy, and coal, be aimed at ash and slag removal and slurry transportation conditions, based on decades of experience in designing and manufacturing slurry pumps, widely absorb advanced technologies and research achievements both domestically and internationally, our factory has developed the latest generation of NFZTC-B series slurry pumps with high flow rate, high head, and multi-level serial connection.

The main technical features of this series of products are as follows:

- Adopting modern CAD design methods, excellent hydraulic performance, high efficiency, and low wear rate; smooth flow, good anti clogging performance, and superior cavitation performance;
- Adopting a combination sealing form of auxiliary impeller and packing or mechanical sealing form to ensure that the slurry will not leak;
- Reliable design ensures a significant increase in the average MTBF time of the entire machine;
- Lubricating metric bearings with thin oil during, and setting up lubrication and cooling systems reasonably to ensure that the bearings operate at low temperatures. The overcurrent components are made of special materials, which have good wear and corrosion resistance;
- Specially treated for seawater ash removal and electrochemical corrosion of seawater and

salt spray;

- It can be used in multiple stages in series within the allowable pressure range, with a maximum allowable working pressure of 3.6 MPa.

This series of slurry pump products have the advantages of reasonable structure, high efficiency, reliable operation, and convenient maintenance. They are widely used in industrial sectors such as power, metallurgy, mining, coal, building materials, chemical industry, etc. to transport abrasive or corrosive slurry, especially power plant ash.

Pump outlet diameter (mm)

产品特点

NFZTC-B(P)系列陶瓷渣浆泵为卧式、单级、单吸、悬臂、双泵壳、离心式渣浆泵。该泵从驱动端看顺时针旋转。相同口径的NFBTC型渣浆泵的过流部件可以互换，外形安装尺寸相同。NFZTBC(P)系列渣浆泵的传动部分采用水平中开式稀油润滑托架，并设有内外两组水冷却系统。必要时可加冷却水。预留的冷却水接口、冷却水压力参考表1。

NFZTC-B(P)系列渣浆泵的轴封形式有两种：副叶轮加填料组合式密封和机械密封。凡串联渣浆泵（二级或二级以上）建议采用有高压轴封水的机械密封。单级或串联一级采用副叶轮加填料组合式密封。轴封形式轴封水压、水量如下：

1、轴封水泵：对于单级（或串联一级）采用填料加副叶轮组合式密封，轴封水压力一般为0.2–0.3 Mpa。对于多级串联采用填料加副叶轮组合式密封，二级和二级以上轴封水最低压力一般为：

$$P_n = \frac{H}{H_i} H_i + 0.7 H_n; H_i \text{ 为第 } i \text{ 级泵扬程; } H_n \text{ 为第 } n \text{ 级泵扬程。}$$

对采用机械密封，各级泵的轴封水压力一般要求比泵出口压力大0.1MPa。

2、轴封水量(见表1)

Product Features

The series NFZTC-B(P) slurry pump is horizontal, single-stage, single-suction, double-casing, centrifugal slurry pump. The pump rotates in clockwise viewed from the drive end. The wet parts of NFZTC-B pump at the same outlet diameter can be interchangeable. Their outline installation dimensions are one and the same. For the drive part of the series NFZTC-B(P) slurry pump, the horizontal split frame with oil lubrication and two sets of water cooling systems inside and outside has been adopted. If necessary, cooling water can be supplied. The prepared joint for cooling water and the pressure of the cooling water can be seen in table 1.

Two kinds of shaft seal-expeller seal combined with packing and mechanical seal have been used for series NFZTC-B(P) slurry pump. The mechanical seal supplied with high pressure sealing water is recommended when the slurry pump is operated in series (two stages and above two stages), and the expeller seal combined with packing, the water pressure of the shaft seal is 0.2–0.3MPa.

For multi-stage (two and above two stages) in series operation with the expeller seal combined with packing, the lowest sealing water pressure of n stage : $P_n = \frac{H_i}{n} + 0.7H_n$; H_i is i stage pump head; H_n is n stage pump head.

For mechanical seal, the sealing water pressure of each stage of pump is higher 0.1MPa than pump discharge pressure.

2.Sealing water pressure(see table 1).

NFZTC SERIES COMPOSITE CERAMIC SLURRY PUMP NFZTC系列复合陶瓷渣浆泵

NFZTC-H型泵为悬臂、卧式离心渣浆泵。适用于冶金、矿山、煤炭、电力、建材等工业部门输送磨蚀性或腐蚀性渣浆。

NFZTC-H也称为重型渣浆泵，适于输送强磨蚀高浓度渣浆或低浓度高扬程渣浆。在压力允许的范围内，该类型泵也可以多级串联使用。

NFZTC-H型泵的轴封可采用填料密封，付叶轮密封和机械密封。泵的吐出口位置可根据需要按45℃间隔，旋转八个不同的角度安装使用。

Type NFZTC-H pumps are cantilevered, horizontal, centrifugal slurry pumps. They are designed for handling abrasive or corrosive slurry in the metallurgical, mining, coal, power, building material and other industrial departments etc.

NFZTC-H are also called heavy duty slurry pumps, are used to transport the strong abrasive high density or low density high head slurry. Under the allowable pressure, the pumps of this type also can be installed in multistage series.

The shaft seals for type NFZTC-H and M pumps can be adoptable of gland seal, expeller seal and mechanical seal. The discharge can be positioned at intervals of 45 degrees by request and oriented to any eight positions to suit installations and applications.

复合陶瓷渣浆泵	Composite Ceramic Slurry Pump		

托架说明 Support Type Description

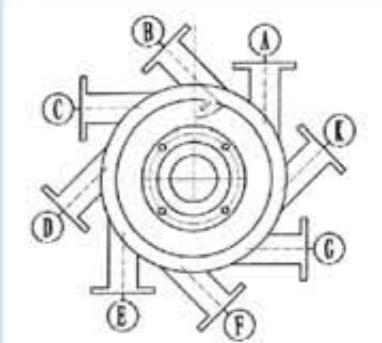

托架形式 Support Type	A	B	C	D	E	R	F	G	S	T
允许配套功率 Allowable Max power(kw)	7.5	15	30	60	120	300	260	600	560	1200
托架重量 Support Weight(kg)	17	24	45	77.5	154	228	555	1006	546	1156
轴封水量 Shaft seal water Volume(l/s)	0.15	0.25	0.35	0.55	0.70	0.70	0.70	1.20	1.20	1.60

从进口看可有A、B、C、D、E、F、G、K八个安装角度。

From suction view, there can be eight installation angle.

B托架只有A、C、E、G四个安装角度，B出口方向不适于CV传动。

B support type only has four installation angle, but CV transmission is not applicable.

NFZTC-H型渣浆泵在各种不同行业的应用：

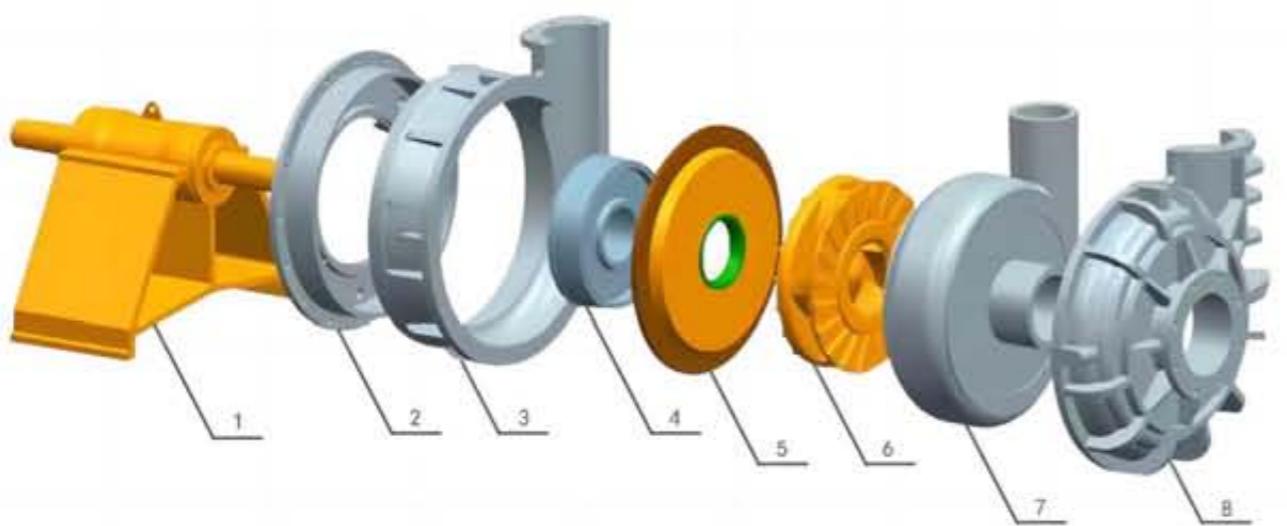

The application of slurry pumps in various industries:

氧化铝	Alumina	铜矿	Copper	石油	Oil Shale
石棉	Asbestos	电业	Electric Utilities	磷酸盐	Phosphate
铝土矿	Bauxite	金矿	Gold	碳酸钾	Potash
建材	Building Products	铁矿	Iron Ore	纸浆	Paper & Pulp
水泥	Cement	铅锌矿	Lead & Zinc	砂砾	Sand & Gravel
煤炭	Coal	矿砂	Mineral Sands	银矿	Silver
化学肥料	Chemical Fertilizer	钼	Molybdenum	钢铁	Steel
钨锰矿	Wolfram	糖	Sugar	钛矿	Titanium
水处理	Water & Sewage Treatment	锡	Tin	烟草	Tobacco

注:

- 推荐流量范围为50% Q'≤Q≤110% Q' (Q相当于最高效率点流量) ;
- NPSH是指最高转速时，推荐Q点所对应的NPSH值。

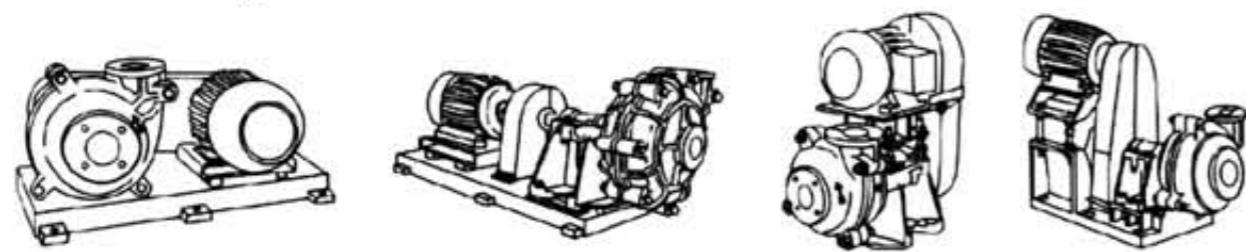

Remark:

- Capacity range recommended:50% Q'≤Q≤110% Q' (Q' Appropriate to capacity at highest efficiency point).
- NPSH:appropriate to point Q recommended at highest speed.

SELECTION OF CERAMIC MATERIALS

陶瓷材料选择

NFZTC烧结碳化硅陶瓷系列

反应烧结碳化硅陶瓷又称自结合碳化硅陶瓷。其塑性坯料一般由碳化硅粉($\sim 5\text{ }\mu\text{m}$)、碳或石墨以及塑性剂混合而成，坯料经压制、挤压、注浆或其他成型方法制成塑坯。塑性剂燃烧或热解为多孔的炭，液态或气态的硅与无定型碳或石墨反应生成SiC。反应生成的SiC多晶与SiC粉连成一体，过量的硅[$\sim 10\%$ (vol)]填充了微孔得到无气孔的制品。用此材料做成的过流件，在效率和使用寿命上都明显提高。

NFZTC sintered silicon carbide ceramic series

The reaction sintered silicon carbide ceramic is also called self-binding silicon carbide ceramics. The plastic blank is generally mixed by silicon carbide powder ($\sim 5\text{ }\mu\text{m}$), carbon or graphite, and plastic agents, and the blank is pressed, extruded, grout, or other molding method into aplastic. The plastic agent combustion or pyrolysis into a porous carbon, liquid or gaseous silicon is reacted with an amorphous carbon or graphite reaction to form a SiC. The SiC polycrystalline formed by the reaction was integrated with SiC powder, and excessive silicon [$\sim 10\%$ (Vol)] filled the micropores to obtain an airless-free article. The excessive flow made by this material is significantly improved in efficiency and service life.

NFZTC-S氮化硅结合碳化硅陶瓷系列。

氮化硅(Si₃N₄)结合碳化硅(SiC)陶瓷材料，主要以氮化硅(占23%)、碳化硅为主要原料，配以有机物料，经混料、挤压或浇注成型，烘干、氮化而成。在烧结陶瓷的优点之上进一步提升了材料对于大颗粒冲击性的耐受力，同时耐磨性也有提升，提高了过流件的使用寿命。

NFZTC-S silicon nitride binding silicon carbide ceramic series

Silicon nitride (Si₃N₄) binds to silicon carbide (SiC) ceramic material, mainly based on silicon nitride (accounting for 23%), silicon carbide as the main raw material, with organic materials, mixed, extrusion or casting, drying, Nitridation. Further improvement above the advantages of sintering ceramics, for large particle impact resistance, while wear resistance is also improved, increasing the service life of the excess flow.

SELECTION OF CERAMIC MATERIALS

陶瓷材料选择

NFTC复合陶瓷脱硫泵系列

我公司的陶瓷铸造技术采用国际先进的碳化硅真空配料、真空浇铸技术，碳化硅陶瓷层内部组织致密，无缩松和气孔缺陷，与金属骨架结合紧密，不易剥落，表面光洁细密，堪称完美。针对国内外原先陶瓷泵实际运行中存在的陶瓷脆性大易破碎的弱点，我司采用了具有自主知识产权的全金属骨架的结构，有效地解决了陶瓷破碎特别是叶轮存在的整体破碎的风险问题，从根本上解除了客户的后顾之忧。

NFTC composite ceramic desulfurization pump series

Our company's ceramic casting technology uses international advanced silicon carbide vacuum ingredients, vacuum casting technology, internal tissue inside the silicon carbide ceramic layer, has no shortage of plenty of poral defects, combined with metal skeleton, is not easy to peel off, and the surface is smooth and fine, it is perfect. At the actual operation of the original ceramic pump, the original ceramic pump is actually running, and our company adopts the structure of the full metal skeleton with independent intellectual property, effectively solves the overall crushing risk of ceramic crushing, especially impeller. Since fundamentally released the worries of customers.

NFZTC-R柔性碳化硅陶瓷系列

该系列产品选用进口SiC粉末并结合我司自主知识产权的无机材料铸造而成。SiC和无机材料拥有优势互补的特性，选用此两种材料并通过国际领先的真空配料、真空浇铸技术进行结合成型，与陶瓷材料相比，物理性能提升显著。目前此新型材料的发明研制，使得碳化硅陶瓷产品抗冲击性能显著增强，达到行业领先水平。

NFZTC-R flexible silicon carbide ceramic series

This series of products use imported SiC powder and combined with the inorganic material of our own independent intellectual property rights. The SiC and inorganic materials have the advantages complementary characteristics, and these two materials are selected and combined with the international leading vacuum ingredients, vacuum casting techniques, and physical properties have been significantly improved compared to ceramic materials. At present, the invention of this new material is developed, which significantly enhances the impact resistance of silicon carbide ceramic products, which has reached the industry's leading level.
